Dear Mr. Fitzwater,

Boise Cascade Paper Group is working with the inventor of a new paper product - NoCopi. The product is designed to help provide security against unwanted photocopying - information typed or copied onto this sheet is either difficult or impossible to read after photocopying.

While this paper is still in the developmental stage, a trial production run was recently completed and samples are attached. They represent varying degrees of security.

Sample 1 - Paper News

This product approaches total security

Sample 2 - Summit 3800 Press Tips and Sample 3 -

Key Med Newslne

These sheets are more readily photocopied

Sample 4 - Built In Security

This is easier to read and easier to copy

We invite you to test these four samples on the copier in your office. It is important to note that all copiers are not the same - some are more sensitive to a wider spectrum of colors than others.

After you've had a chance to test these samples, please fill out the attached questionnaire and return to me in the stamped, self-addressed envelope provided.

Sincerely,

BOISE CASCADE CORPORATION
